Buffer Stop

This evening David Pinder, station manager for the Oxford area, will be giving a presentation on the Great Western Railway. GWR 166 204 was seen at Oxford on a local to Moreton-in-Marsh earlier this year.

Last month Steve Beamon gave a presentation on a subject little known to most of us, Policing for Railways, Docks and Canals 1824 to 1948.

Next month on June 14, Dr David Turner will be talking on The Life and Legacy of George Bradshaw (*right*).

ORS evening meetings then resume on September 13.

BUBBLES BURST

On May 19 Chiltern Railways runs its last Class 121 single-unit "Bubble cars", green 55034 and blue 55020 (at Aylesbury depot, right), on the Aylesbury–Princes Risborough peak-hours shuttle, the victims of old age, increasing passenger traffic and demand for on-train wi-fi. From the following Monday the service is diagrammed for a Class 165 unit. Built in 1960, the ex-Western Region Pressed Steel units are the oldest passenger-carrying vehicles in timetabled service with a mainland train operating company. With half

a dozen already preserved, the pair will certainly be popular acquisitions for heritage lines on retirement.

G&WR

The Garden & Woodland Railway at Thame is an amazing private 7¼ inch gauge ground-level steamworked passenger carrying system following the practices of a larger company with similar initials. It makes an excellent afternoon out, and the ORS has arranged a visit on *Sunday 9 July* – sign up tonight.
